roles / jobs available and their road maps :
Software Engineer : https://roadmap.sh/pdfs/roadmaps/full-stack.pdf
Data Scientist : https://roadmap.sh/pdfs/roadmaps/ai-data-scientist.pdf
DevOps Engineer : https://roadmap.sh/pdfs/roadmaps/devops.pdf
QA Engineer : https://roadmap.sh/pdfs/roadmaps/qa.pdf
UX Designer : https://roadmap.sh/pdfs/roadmaps/ux-design.pdf
Backend : https://roadmap.sh/pdfs/roadmaps/backend.pdf
Blockchain : https://roadmap.sh/pdfs/roadmaps/blockchain.pdf
Cybersecurity : https://roadmap.sh/pdfs/roadmaps/cyber-security.pdf

EMPLOYEES Dashboard:
- **employee infos :**
  (_id,contract_type,country_of_birth,email,gender,hire_date,length_of_service_days,level,name,role,salary)
- **initial project :**
  it should give to each new employee an initial project that they can develop or work on , so the shadow mentor can follow their work
- **Certifications road map :**
  diagrams of his role's road map (link to PDF files)
- **salary insight :**
  a simple projection of how his salary can increase afte passing the next certificate

- **Follow up :**
  this will follow his progress on each certification path he is currently enrolled in
- **Performance tracking :**
  (Score + initial Project monitoring + Test with 3 retakes before enrolling in the certificate)
- **Schedueling (basically its a sort of a smart calendar) that contains :**
  daily tasks
  (a switch button to switch between Active schedueling or Manual)
  meetings
  and a predictive clock that shows he might be late or he might be working slower that his peers or than the average

ADMIN / HR   Dashboard :
keep the same but only add some few
